EDUCATION

- **Maharaja Agrasen Institute of Technology** New Delhi, India
BTech in Computer Science and Engineering ; CGPA: 9.20 *Dec 2020 - July 2024*
Highlights: Editorial Team Lead at IEEE MAIT, GDSC MAIT Mentor, Lead HackwithMAIT 3.0 organizing team with over 300 hackers.

SKILLS

- **Languages:** C, C++, Rust, JavaScript, TypeScript, Java, Solidity, Python
- **Front-End Development:** React.js, Next.js, React Native, Redux, Webpack, Vite
- **Back-End Development:** Node.js, Express.js, SQL, MongoDB, Apache XAMPP, Flask, Sockets, Redis
- **Tools + DX:** AWS, Firebase, Bun, Docker, Postman, Twilio, Solana, Railway, Vercel, PlanetScale, Apache Solr

EXPERIENCE AND INTERNSHIPS

- **GirlScript Summer of Code'23** Remote
Program Manager *April 2023 - Current*
 - 3-month long Open-Source Program conducted every summer by the GirlScript Foundation.
 - Led the team to organise the biggest-ever edition with over 13k contributors taking their first steps in open-source.
- **Logizip LLC** Remote
Full-Stack Developer *October 2022 - Current*
 - Trucking logistics solutions platform to automate transport workflows. Scaled the backend service with optimizations and implemented sockets with Solr search.
 - Engineered the full-stack code along with onboarding private alpha users with an increase of 200% in web app traction.
- **Major League Hacking Fellowship** Remote
Prep Fellow and Mentor *August 2022 - September 2022*
 - Worked on a portfolio of open-source projects experimented with new technologies by collaborating in small groups through a short hackathon sprint.
 - Mentored first-party hackathons across the year helping students build and learn during the hackathon.
- **TweepsBook** Remote
Full Stack Developer Intern *June 2022 - August 2022*
 - TweepsBook, an enhanced bookmarking tool to power Twitter users that helps you streamline the clutter by adding different tags and organising tweets based on your liking.
 - Developed and launched a high-performance web app, achieving over 100k bookmarks within a month and driving a 40% increase in user engagement through seamless navigation and intuitive design

PROJECTS

- **PaperBrain (AI/ML + Next.js):** An app for accessing and understanding research papers. We provide a fascinating interface for users to search for papers and use the power of the GPT-3 model to help them understand it better. With over **30k page views within 15 days of launch, PaperBrain has over 500 daily users.**
- **Travel Time (Web3 DeSo + React):** Travel Time features the ability for users to plan trips, create NFTs, talk with others about their trip experiences with blogs and comments, and compete against others for mileage.
- **Legal AI (Next.js + Firebase):** Legal AI is a revolutionary web app that allows you to easily understand legal documents by interacting with them in a natural way. It allows you to "talk" to the document and ask any question you have, receiving clear and concise answers.

HONOURS AND AWARDS

- **Auth0 Ambassador** - Got featured as an Auth0 Ambassador
- **BuildSpace N&W** - Graduated from the Nights and Weekends S2 program
- Won "**Honourable Mention Prize Winner**" at **Twitter's** Chirp Developer Hackathon with folks at TweepsBook
- 2nd Position and Best Design for **MetroHacks 2022**
- Most Creative Use of Twilio - Won **Twilio** sponsor prizes for Hackathons (MLH, HackUNT) hosted by MLH
- Mentored over five hackathons - DUHacks 2022, Hawk Hacks 2022, Gryph Hacks 2022 and more!
