EDUCATION

- **Maharaja Agrasen Institute of Technology** New Delhi, India
BTech in Computer Science and Engineering ; CGPA: 9.20 *Dec 2020 - July 2024*
Highlights: Editorial Team Lead at IEEE MAIT, GDSC MAIT Mentor, Lead HackwithMAIT 3.0 and 4.0 organizing team with over 600+ hackers.

SKILLS

- **Languages:** C, C++, Rust, JavaScript, TypeScript, Python, Java, Solidity
- **Front-End Development:** React.js, Next.js, React Native, Redux, Webpack, Vite
- **Back-End Development:** Node.js, Express.js, **SQL**, Apache XAMPP, Flask, Sockets, **Redis**
- **Tools + DevOps:** AWS, Firebase, Docker, Azure App Services + VMs, Twilio, Solana, Vercel, PlanetScale, Supabase, Jenkins, Stripe

EXPERIENCE AND INTERNSHIPS

- **Listnr AI** Remote
Software Engineer *December 2023 - Present*
 - Listnr's Generative AI Engine lets you create voiceovers with 1000+ different voices, serving **over 1.2 mn** users across the globe.
 - Worked with **Redis + Azure** and remodelled the voice cloning and podcast distribution flow across Listnr suite.
- **Logizip LLC** Remote
Full-Stack Developer *October 2022 - October 2023*
 - Trucking logistics solutions platform to automate transport workflows. Scaled the backend service with optimizations and implemented sockets to have real-time functionalities
 - Engineered the full-stack code along with onboarding private alpha users with an **increase of 80%** in web app traction.
- **GirlScript Summer of Code'23** Remote
Program Manager *April 2023 - September 2023*
 - 3-month long Open-Source Program conducted every summer by the GirlScript Foundation.
 - Led the team to organise the biggest-ever edition with **over 13k** contributors taking their first steps in open-source.
- **Major League Hacking Fellowship** Remote
Prep Fellow and Mentor *August 2022 - September 2022*
 - Led a portfolio of open-source projects experimented with new technologies by collaborating in small groups through a short hackathon sprint.
 - Mentored over 10 first-party MLH hackathons across the year helping students build and learn during the hackathon.

PROJECTS

- **PaperBrain (AI/ML + Next.js):** An app for accessing and understanding research papers. We provide a fascinating interface for users to search for papers and use the power of our model to help them understand it better. With over **50k signups within 3 months of launch, PaperBrain has over 500 daily users.**
- **TweepsBook(React.js + SQL):** TweepsBook, an enhanced bookmarking tool to power Twitter users that helps you streamline digital clutter, **it achieved over 100k bookmarks** within a month
- **Legal AI (Next.js + Firebase):** Legal AI is a revolutionary web app that allows you to easily understand legal documents by naturally interacting with them. It allows you to "talk" to the document and ask any question you have, receiving clear and concise answers.

HONOURS AND AWARDS

- **Auth0 Ambassador** - Got featured as an Auth0 Ambassador
- **BuildSpace N&W** - Graduated from the Nights and Weekends S2 program
- Won "**Honourable Mention Prize Winner**" at **Twitter's** Chirp Developer Hackathon with folks at TweepsBook
- 2nd Position and Best Design for **MetroHacks 2022**
- Most Creative Use of Twilio - Won **Twilio** sponsor prizes for Hackathons (MLH, HackUNT) hosted by MLH
- Mentored over five hackathons - DUHacks 2022, Hawk Hacks 2022, Gryph Hacks 2022 and more!
